Wisconsin Department of Natural Resources Natural Resources Board Agenda Item

Item No.

Tuesday 3B1

SUBJECT: Request that the Board approve the department implementation plan for hunting, fishing and trapping in Wisconsin State Parks in accordance with 2011 Wisconsin Act 168.

FOR: December 2012 Board meeting

TO BE PRESENTED BY: Dan Schuller, Director, Bureau of Parks and Recreation; Kurt Thiede, Administrator, Land Division.

SUMMARY:

On April 2, 2012, the State of Wisconsin enacted Wisconsin Act 168, generally referred to as the "Sporting Heritage Bill". As part of Act 168, Wisconsin State Park properties will now be open for hunting, fishing and trapping. This "open until closed" status is a change from the former status of "closed until open". State Park properties had been established as state wildlife refuges in the 1930's, with a number of state park properties opened for limited hunting since that time.

Under Act 168, the department may prohibit hunting, fishing, or trapping on a state park property, or a portion of a state park property, on lands within 100 yards of designated use areas. The Natural Resources Board may further determine, under the authority of Act 168, that prohibiting hunting, fishing, or trapping on a state park property or a portion of a state park property is necessary to protect public safety or to protect a unique animal or plant community.

The Natural Resources Board held five listening sessions (Fitchburg, Eau Claire, Merrill, Appleton, and Milwaukee, WI) on this subject matter during the period of October 29th to November 13th, 2012. In addition, the department took written comments through November 23rd, 2012.

Department staff will provide the Natural Resources Board with the plan for department permitted closures as well as recommend Board approval on additional closures on state park lands.

RECOMMENDATION: Approval of department implementation plan for hunting, fishing and trapping in Wisconsin State Parks in accordance with 2011 Wisconsin Act 168.

CORRESPONDENCE/MEMORANDUM

DATE:

December 6, 2012

TO:

All Members of the Natural Resources Board

FROM:

Cathy Stepp, Secretary

SUBJECT: Approval of department implementation plan for hunting, fishing and trapping in Wisconsin

State Parks in accordance with 2011 Wisconsin Act 168.

Background:

The Sporting Heritage Act of 2012 (Act 168) opens state park lands to hunting, fishing, and trapping. Prior to this act, state park lands were closed until opened. Under Act 168, they are opened until closed for hunting, fishing and trapping. The Act provides two provisions for closing state parks. The first allows (but does not require) the Department of Natural Resources to prohibit hunting, fishing and trapping within 100 yards of a designated use area. Secondly, the Act allows the Natural Resources Board, by majority vote, to prohibit hunting, fishing and trapping on a portion or all of a state park when necessary to protect public safety or to protect a unique animal or plant community.

Wisconsin Act 168 was formerly identified as Assembly Bill 311, and was introduced to the State Assembly on October 6, 2011. An amendment was later added creating Section 10, which amended Chapter 29.08 of the statutes and opened state parks to hunting, fishing and trapping. The bill, including the amendment to add hunting, fishing, and trapping in state parks, passed the Assembly on November 1, 2011 by a vote of 84 to 12. The bill passed the State Senate on March 7, 2012 by a vote of 32 to 1. The bill became law on April 2, 2012. Act 168 opens state park properties to hunting, fishing and trapping beginning on January 1, 2013.

During the summer and fall of 2012, the department held meetings on this subject with state park property staff and subject matter experts from the following programs: Parks, Forestry, Legal, Law Enforcement and Wildlife. The goal was to create a draft implementation proposal for Act 168 that could be reviewed by the public. During this time period the department also consulted on Act 168 and with all tribes in the ceded territory, and later consulted with the Voigt Task Force on November 1, 2012. The draft implementation proposal was made available by public notice for public review on the department's website on October 26, 2012 in advance of Natural Resources Board's Listening Sessions.

The Natural Resources Board held five public listening sessions around the state of Wisconsin between October 29 and November 13, 2012. The purpose of the sessions was to gain feedback from the public on the draft implementation proposal of Act 168 on state park lands. The department kept detailed information on each session and comments. After the public listening sessions ended, the department reviewed and made changes to its original proposal and created an "implementation plan" for managing Act 168. That adjusted implementation plan is included in this Green Sheet package, and is being presented to the Natural Resources Board for approval.

Why this Implementation Plan is being proposed?

In its passage of Act 168, the state legislature provided to the department and the Natural Resources Board the ability to prohibit hunting, fishing, and trapping on state park lands. From Act 168:

29.089(1m) of the statutes is created to read:

- (a) Except as provided in par. (b), state parks shall be open to hunting, fishing, and trapping by persons who hold the appropriate approvals required under this chapter.
- (b) The department may prohibit hunting, fishing, or trapping in a state park or a portion of a state park if any of the following applies:
 - 1. The department prohibits hunting, fishing, or trapping within 100 yards of a designated use area.
- 2. The natural resources board determines that prohibiting hunting, fishing, or trapping is necessary to protect public safety or to protect a unique animal or plant community. A determination to prohibit hunting, fishing, or trapping in a state park or a portion of a state park under this subdivision requires 4 or more members of the natural resources board to concur.

By insertion of this language, the legislature signaled its understanding that not all state park properties or all portions of state park properties, may be appropriate for hunting, fishing, or trapping. The department, after extensive review and public input, has developed an implementation plan meeting the standard established by law. This plan acknowledges the intent of the law and that many state park properties: are small; are in highly developed urban areas; are in municipalities where firearm prohibitions currently exist; have some areas near schools; are heavily utilized by other recreationists during normal hunting and trapping seasons; have special events and school activities; or have developed facilities that are utilized year-round. The department's plan to prohibit hunting within 100 yards of certain designated use areas is based on department knowledge of use patterns and from public input. The additional closures in the plan that are proposed for Natural Resource Board approval have been identified to protect public safety.

What is included in "state parks" under Act 168?

The Wisconsin State Park System is comprised by statute of state parks, state trails, state ice age and north country trail areas, state recreation areas and southern state forests. Act 168 covers "state parks", which by definition covers state parks, state trails, and state ice age and north country trail areas. The Act does not cover state recreation areas or southern state forests. There are 54 state parks, 41 state trails and 53 state ice age and north country trail areas covered by Act 168. A complete guide to each Wisconsin state park property can be viewed at http://dnr.wi.gov/topic/parks/.

State park properties covered by Act 168:

State parks: (54) Amnicon, Aztalan, Belmont Mound, Big Bay, Big Foot Beach, Blue Mound, Brunet Island, Buckhorn, Campbellsport Drumlin, Capital Springs, Copper Culture, Copper Falls, Council Grounds, Cross Plains, Devil's Lake, Governor Dodge, Governor Nelson, Governor Thompson, Grand Traverse, Harrington Beach, Hartman Creek, Heritage Hill, High Cliff, Holzhueter Farm, Interstate, Kinnickinnic, Kohler-Andrae, Lake Kegonsa, Lake Wissota, Lakeshore, Lost Dauphin, Merrick, Mill Bluff, Mirror Lake, Natural Bridge, Nelson Dewey, New Glarus Woods, Newport, Pattison, Peninsula, Perrot, Potawatomi, Rib Mountain, Roche-A-Cri, Rock Island, Rocky Arbor, Straight Lake, Tower Hill, Two Creeks, Whitefish Dunes, Wildcat Mountain, Willow River, Wyalusing, and Yellowstone.

State trails: (41) 400, Ahnapee, Badger, Bearskin, Buffalo River, Capital City, Cattail, Chippewa River, Devils River, Eisenbahn, Elroy-Sparta, Fox River, Friendship, Gandy Dancer, Glacial Drumlin, Great River, Green Circle, Hank Aaron, Hillsboro, National and State Ice Age Trail, La Crosse River, Mascoutin Valley, Military Ridge, Mountain Bay, Newton-Blackmour, Nicolet, National and State North Country Trail, Oconto

River, Old Abe, Pecatonica, Red Cedar, Saunders, Stower Seven Lakes, Sugar River, Tomorrow River, Tuscobia, White River, Wild Goose, Wild Rivers, Wiouwash, and Wolf River.

State ice age trail areas (lands acquired for the Ice Age National Scenic Trail): These properties (47) are located in seventeen counties across the state. State north country trail areas (lands acquired for the North Country National Scenic Trail): These properties (6) are located in two counties in northwest Wisconsin.

State Park properties not covered by Act 168:

- Badger State Trail The department does not own the land under this trail. It is being leased to the department for the singular purpose of allowing a recreational trail.
- Capital City State Trail There are no state park lands on this trail.
- Certain segments of the Ice Age Trail and the North Country Trail where the department has acquired easements for the singular purpose of allowing a recreational trail.
- Certain segments of the Ice Age Trail and the North Country Trail where that portion of the trail is on department land that is non-state park land.
- Green Circle State Trail The department does not own the land under this trail.
- Lower St. Croix State Park Riverway The department owns scenic easements only on this land.
- Portions of the Nicolet State Trail The department does not own all the land under this trail.

State Park properties owned by the department but managed by others and covered by Act 168:

State Parks: Belmont Mound, Capital Springs, Copper Culture, Heritage Hill and Lost Dauphin.

State Trails: Ahnapee, Capital City, Cattail, Devils River, Eisenbahn, Fox River, Friendship, Gandy Dancer, Green Circle, Hillsboro, Mascoutin Valley, Mountain Bay, Newton-Blackmour, Nicolet, Oconto River, Old Abe, Pecatonica, Saunders, Stower Seven Lakes, Tomorrow River, White River, Wild Goose, Wild Rivers, Wiouwash, and Wolf River.

The department will provide the Act 168 Implementation Plan to managing partners to follow once it is approved. Hunting and trapping was not previously approved by the department on these lands.

Total state park lands acreage covered by Act 168:

The total acreage of state park lands affected by Act 168 is 97,706. A complete listing of all acres by property is included below in Table 1.1.

Also included below are a map of all state parks and trails and a map indicating the placement of all 47 state ice age trail areas and six state north country trail areas.

The DNR proposed Implementation Plan for Act 168.

Except as provided below, the department is recommending that state parks shall be open to hunting, fishing, and trapping by persons who hold the appropriate approvals required under s. Ch. 29.

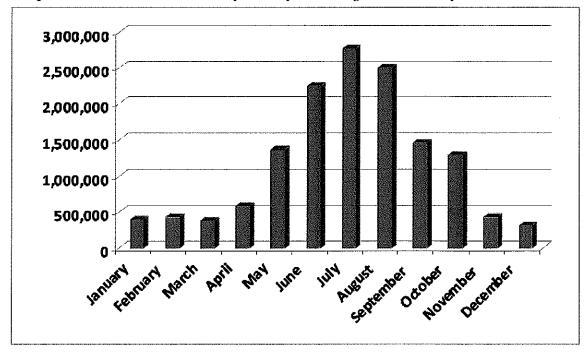

Department Closure Authority:

- The department will be prohibiting hunting in state parks within 100 yards of certain designated use areas. The areas proposed for closure generally include campgrounds, picnic areas, entrance stations, day use areas, beaches, boat ramps, towers and vistas, and educational areas. Closures are also being planned in some state parks for high-use trails and parking areas. For detail regarding each department plan, please refer to the individual map of each state park property. These maps are also located at: http://dnr.wi.gov/topic/parks/hunt/index.html.
- The department will be limiting trapping in state parks to areas open to hunting with the additional provision that no trapping may occur within 100 yards of any state park designated trail. For trail locations, please refer to the individual map of each state park property. These maps are also located at: http://dnr.wi.gov/topic/parks/hunt/index.html.
- The department will be prohibiting bow and spear fishing within 100 yards of a beach, boat launch, or fishing pier within a state park. Line fishing rules are accepted by the department as now set in statewide regulation.
- The department will be prohibiting hunting or trapping occurring within 100 yards of the trail tread on all state trails, except where noted on a map for the Ice Age Trail and North Country Trail where those two trails are located on state park lands.
- The department will be prohibiting, as it deems necessary, hunting and trapping, with public notice, within 100 yards of certain designated use areas and accompanying entry roads and parking areas for purposes of hosting special events at state park properties.

Natural Resources Board Closure Authority - Department Requests:

- The department is requesting approval to close the following state park properties completely to all hunting and trapping activity: Copper Culture, Cross Plains, Heritage Hill, Lakeshore, and Lost Dauphin state parks, and the Hank Aaron State Trail. These properties are either too small, have high density year-round use, or are completely within an urban zone.
- The department is requesting that the Natural Resources Board expand hunting and trapping closure areas in some state park properties. These closed areas will be beyond the department's 100 yard closure authority from designated use areas. This request is to protect public safety. Board closures of this nature would most generally be related to; 1) areas that are too small to safely hunt and trap. 2) areas that are near schools or significant residential development. 3) areas that are near heavily used trail systems, 4) state park properties with extensive equestrian use, and 5) state park properties with significant year-round visitor attendance. For individual state park properties affected by this closure request, please refer to the individual map of each state park property. These maps are also located at: http://dnr.wi.gov/topic/parks/hunt/index.html.
- The department is requesting that the Natural Resources Board close all park properties to hunting and trapping between 11:00 p.m. on the Thursday prior to Memorial Day to 6:00 a.m. on October 15th each year. This request is being made to protect public safety. The period of time between Memorial Day weekend and Columbus Day weekend is the highest use period for Wisconsin State

Parks. Graph 1.2 shows the three-year average attendance by month in the Wisconsin State Park System.

Graph 1.2 - Wisconsin State Park System 3-year average attendance by month:

- The department is requesting that in addition to the above stated closure dates, the following seven properties would have a portion of their lands delayed for opening for hunting and trapping until 6:00 a.m. on November 15th each year; Council Grounds, Hartman Creek, High Cliff, Lake Wissota, Peninsula, and Wildcat Mountain state parks, and the Elroy-Sparta State Trail. This request is due to the high volume of visitors and trail users at these properties, including late fall equestrian use. This request is also being made to protect public safety. The portions of these properties being requested to have a November 15th opening for hunting and trapping are found on the maps or can be viewed at: http://dnr.wi.gov/topic/parks/hunt/index.html.
- The department is requesting that the portion of Rib Mountain State Park leased to Granite Peak Ski Corporation be closed to hunting and trapping until April 15th each year (when ski operations have ceased completely for the year) and be open until 11:00 p.m. on the Thursday prior to Memorial Day each year.
- The department is requesting that the Natural Resources Board limit the hunting and trapping hours for safety reasons during open seasons as follows: Standard state park property hours are 6 a.m. 11 p.m. Hunters and trappers can enter a state park property one hour prior to the daily hunting and trapping starting times. When department regulations do not establish daily season opening and closing times, hunters and may enter the state park property one hour prior to sunrise. All hunting activities will end at 11 p.m. Statewide trapping hours apply and are 4 a.m. 8 p.m.
- The department is requesting for public safety that hunting be limited to archery only on all lands open to hunting at Big Foot Beach, High Cliff, Lake Kegonsa and Peninsula state parks, and the state ice age trail area north of Slack Road (Gibraltar Rock Area map 29 of 47) in Columbia County. The department is also requesting that hunting be limited to archery on a portion of Rib Mountain State Park.

• There are currently 14 state parks where a park-specific deer management unit has been established under Wis. Admin. Code ss. NR 10.104 and 10.28. In these parks, a person hunting antierless deer is required to possess a current valid antierless permit for the unit (or for a surrounding or adjacent unit if hunting with a bow and arrow). Buck tags for both archery and firearm seasons are valid statewide. In addition, 11 state parks require an access permit prior to hunting deer with a firearm under Wis. Adm. Code s. NR 10.03(3)(e)2.

There are currently 11 state parks where a park-specific turkey hunting zone has been established, and five state parks where disabled only turkey hunting zones have been established under Wis. Adm. Code s. 10.29. Wild turkey licenses and carcass tags are only valid for the zone and time period they are issued for, with the exception of youths participating in the youth turkey hunt (which are valid for the zone, but not limited by the time period).

Act 168 does not address, and does not affect, deer management units, park firearm hunting access permits, or turkey zones in state parks where they have been created. These are management devices created by rule that address game management concerns and the quality of the hunt. They do not prohibit or close hunting in state parks, and therefore are not in conflict with Act 168. Parks that do not have park-specific units or zones will be incorporated into the surrounding zone. Access permits will not be required for parks not specified by rule. The department plans to evaluate these management devices in the larger context of hunting in state parks, and may pursue rulemaking in the future if it is determined that changes are needed to provide continuity or more effective management.

<u>Changes made to the department proposal after the listening sessions that are reflected in the Implementation Plan for Act 168:</u>

These changes were made after significant public involvement and after reviewing public safety concerns.

- A total of 20 state park maps were changed after the listening sessions. These maps were amended to reflect changes in the allowable hunting/trapping areas.
- A total of 14 state ice age trail area maps were updated. Most were minor updates closing very small
 areas cut off by the Ice Age Trail 100 yard buffer from the rest of the property. The most major
 change was made to the Gibraltar Rock State Ice Age Trail Area (map 29 of 47) where a portion of
 the property is proposed for firearm restrictions and a larger no hunt buffer was added.
- A total of 2,511 acres (as shown on the original public draft proposal) were removed from areas available for hunting and trapping at 34 state parks and state ice age trail areas.
- Certain highly used trail systems at Blue Mound, Council Grounds, Hartman Creek and Newport state parks are now being recommended for closure due to density of other park users during general hunting seasons.
- Hunting and trapping opening dates were recommended to be moved back to November 15th on portions of Hartman Creek State Park and Lake Wissota State Park due to heavy late season use by equestrians during the October 15th to November 14th time period.

State park land acres open to hunting under the Implementation Plan:

Table 1.3 shows that under the Implementation Plan, a total of 62,759 acres of state park lands will be open to hunting, which equates to 64.23% of all state park lands.

Table 1.3
Wisconsin State Parks Acreage Open for Hunting under Implementation Plan

Park/Property	Total Acres	No Hunt Acreage	Huntable Acreage	% Open to Hunt
State Parks	73,689	19,229	54,461	73.91%
State Trails	15,857	12,784	3,073	19.38%
State Ice Age & North Country Trail Areas	8,160	2,935	5,225	64.03%
Totals:	97,706	34,948	62,759	64.23%

How does this plan affect existing policy?

Many of the existing hunting opportunities in state parks are limited by the type of weapon a hunter may permissibly use. For example, Council Grounds and other parks have shotgun only seasons; Wildcat Mountain and other parks have muzzleloader only seasons. These seasons were established under former s. 29.089, which generally prohibited hunting in state parks, except as authorized by rules promulgated by the department.

With the amendment to s. 29.089, both the general prohibition and the ability of the department to create these seasons were removed. The effect of the amendment is to remove these existing weapon-limited seasons to the extent that they conflict with general hunting rules for a particular type of game. Instead, the parks are generally open, subject only to closure as specified in s. 29.089 as amended.

The Natural Resources Board, pursuant to its closure authority for the protection of public safety, may limit the type of weapons authorized for hunting where compelling justification to do so exists. For example, the Board may permissibly determine that in a particular park, hunting with firearms is unsafe, and accordingly limit hunting to archery only. However, "public safety" is limited to humans only. The Board is without authority, for example, to limit the type of traps that may be placed in an area open to trapping to protect dogs, which are "property" and are not properly considered under a "public safety" standard.

While the authority of the Board to do so is not express, it is fairly implied from; 1) the authority to protect public safety, and; 2) the legislative intent to provide widely expanded hunting opportunities in state parks. A contrary reading would lead to results that are not intended by the clear legislative direction to provide more opportunity. Either: 1) all hunting activities would have to be deemed unsafe for the Board to close a park or area or 2) the existence of a public safety concern generated by a particular type of hunting would require the Board to close a park or area to all hunting activities, which would be unnecessary and would run contrary to the legislative intent.

A number of the state parks are within the jurisdictional boundary of a village, city, or township which possesses village authority. Under state law, those local units of government may enact ordinances, resolutions, or other restrictions to protect public health or safety if the restriction has only an incidental effect on hunting. Act 168 does not expressly preempt their ability to enact and enforce those restrictions on state lands. In many instances, the department will consider ordinances prohibiting the discharge of a <u>firearm</u> to meet the "incidental effect" standard; other restrictions may be impermissible if they do not meet the standard or are not protective of public safety.

The department does not have the authority to enforce local ordinances. The general police supervision over state parks given to park rangers and conservation wardens only extends to laws of the state and rules of the department. Accordingly, enforcement related to local restrictions is a matter between a hunter and the local unit of government. The department will only be involved where it is determined that a local restriction does not protect public safety or has more than an incidental effect on hunting.

Other state laws and department rules related to hunting, personal conduct, and the discharge of a firearm are similarly unaffected by Act 168. These include but are not limited to:

- Under Wis. Stat. s. 948.605, a person may not possess a firearm on school grounds (Class I felony) or within 1,000 feet of the grounds (Class B forfeiture), subject to some exceptions unless it is unloaded and encased. Likewise, a person may not discharge a firearm in a school zone, which includes the grounds and the 1,000' (Class G felony), again with some exceptions.
- Under Wis. Stat. s. 29.301(1), a person may not hunt within 1,700 feet of the grounds of a school, hospital, or sanatorium if the restricted area is designated by signs.
- Under Wis. Stat. s. 941,20(1)(d), a person, while on the lands of another, may not discharge a firearm within 100 yards of any building devoted to human occupancy situated on and attached to the lands of another without the express permission of the owner or occupant of the building. The department interprets "lands of another" to mean lands a person does not own, and as such to include state lands.
- Under Wis. Stat. s. 167.31(2)(d), a person may not discharge a firearm or shoot a bolt or an arrow from a bow or crossbow from or across a highway or within 50 feet of the center of a roadway. "Highway" includes roads in state parks open for the purpose of vehicular travel; "roadway" includes the improved portion of a highway. NOTE: There are exceptions to this prohibition, notably for disabled hunters (who can shoot near, but not down or across a roadway) and small game hunters (who can use muzzleloaders or shotguns with certain shot if the roadway is not concrete or blacktop).

Act 168 does affect a number of department rules related to firearms and hunting. These include:

- Wis. Admin. Code s. NR 45.09(1) prohibits the discharge of firearms and bows, as well as the possession of loaded or uncased firearms and uncased bows in state parks. This does not apply to the seasons established in Wis. Adm. Code s. NR 10.01(3), which are the existing state park seasons. There is currently no exception to account for this proposed Board action. However, given the statutory changes made by Act 168, this provision is unenforceable against a person holding the appropriate approval and hunting in an open area of a state park at an open time.
- Under Wis. Admin. Code ss. NR 45.06(1) and (2), dogs in state parks must be on a leash except for use in hunting in an area open to hunting. Act 168 greatly expands the areas and seasons open to hunting, thus expanding the permissible use of dogs off leash for hunting purposes.

Effects of Implementation Plan for Act 168

Effects to hunters and trappers:

Hunters and trappers will gain significant opportunity by the opening of state park lands to hunting and trapping. This includes opening additional park lands acreage that is not currently open to hunting and

trapping. In 2012, there were 55,017 acres open to hunting in the state park system. The vast majority of these acres were only open for gun deer hunting in 2012. Also included in 2012 are 11 state parks that have acreage open for the first three weeks of spring turkey hunting, and three state parks that have some acres open for small game hunting. Under the implementation plan, the department would be opening a total of 62,759 acres to hunting, or an additional 7,742 acres over 2012.

State park lands are currently not open to trapping. Under the implementation plan, all 62,759 acres, less lands in the 100 yard buffer from designated park trails where trapping would not be allowed, would be open to trapping.

The number of hunting days would grow significantly. Act 168 and the department's implementation plan would add a total of 18,198 additional hunting days at Wisconsin state parks, state trails, and state ice age and north country trail areas over the number of days of hunting currently offered in these state park properties. Trappers would gain an additional 21,970 trapping days on state park lands as there are no current trapping opportunities in 2012 on state park lands.

Effects to traditional state park property users:

Wisconsin's state parks and state trails have averaged over 4.4 million visits over the last three calendar years during the months of October-May. These traditional non-summer users (wildlife viewers, picnickers, hikers, runners, bikers, paddlers, geocachers, cross-country skiers, berry pickers, rock climbers, students and volunteers) will encounter the sights and sounds of hunters and trappers on state park lands. However, with the proposal of closed areas, the department has attempted to separate activities to the greatest extent possible. Act 168 and the department's implementation plan may reduce opportunity for traditional state park users if they elect, as many commenters on this topic suggested they would, not to utilize state park properties from October 15th through the Thursday before Memorial Day.

Effects to the Wisconsin State Park System.

The Wisconsin state park system relies on revenues supplied from user fees (79%), state general purpose tax dollars (16%), and federal revenues (4%). The growing reliance on user fee revenue has required the Wisconsin State Park System to reinforce and grow its unique and highly accepted brand in all areas and whenever possible. The state park system has averaged \$5.3 million in user fee revenue over the last three years during the months of October-May. The department will monitor any changes to revenue trends in the initial years of this law.

With the enactment of Act 168 came the responsibility for the department to create an expanded opportunity for two user groups (hunters and trappers). It has not been a simple task, yet the department has listened to a significant number of citizens and crafted a plan that is designed to mitigate user conflicts to the greatest extent possible, support the needs and quality experiences of all users on all state park lands, while minimizing impacts to the valued state park brand.

Effects to small businesses

The department is not anticipating significant impacts to small businesses related to implementing Act 168.

Do other states allow hunting and trapping in state parks?

Most park systems in other states allow some form of hunting on park lands on at least some properties. With this implementation plan, Wisconsin would be one of ten states that allow extensive hunting opportunities.

Attached to this memo is a breakdown of each state park system's hunting provisions. The department was not able to determine which other state park systems allow trapping in state parks.

Table 1.4
Classification of Hunting Policies of 50 State Park Systems

Extensive	Limited	Restricted	No Public
Public Hunting Allowed	Public Hunting Allowed	Public Hunting Allowed	Hunting Allowed
Colorado	Alaska	Connecticut	Alabama
Illinois	Arizona	Georgia	Arkansas
Indiana	Delaware	Hawaii	California
Massachusetts	Maine	Idaho	Florida
Michigan	Maryland	lowa	Louisiana
New Mexico	Minnesota	Kansas	Missouri
Ohio	New Hampshire	Kentucky	Montana
Pennsylvania	New Jersey	Mississippi	Nebraska
Vermont	New York	Nevada	North Carolina
Wisconsin	Oklahoma	North Dakota	South Carolina
	Wyoming	Oregon	Washington
		Rhode Island	West Virginia
Total: 10	Total: 11	South Dakota	
		Tennessee	
		Texas	
		Utah	
		Virginia	
		Total: 17	Total: 12

Public Comments on the Draft Proposal for Implementing Act 168

The department made its draft proposal available on October 26, 2012 to the general public and thereafter took public comments through November 23, 2012. The public comment period included five listening sessions around the state with the Natural Resources Board where oral and written comments were taken.

Oct. 29, Fitchburg - Quality Inn and Suites, 2969 Cahill Main, with board members Preston Cole and Jane Wiley present.

Oct. 30, Eau Claire - Chippewa Valley Technical College (CVTC), 620 W. Clairemont Ave., with board members Dave Clausen and Jane Wiley present.

Nov. 5, Merrill - Merrill High School, 1201 N. Sales St., with board members Christine Thomas and Jane Wiley present.

Nov. 8, Appleton - The Bordini Center, Fox Valley Technical College Campus, 5 Systems Drive, with board members William Bruins, Terry Hilgenberg and Jane Wiley present.

Nov. 13, West Allis - Tommy Thompson Youth Center (State Fair Park), 640 S. 84th St., with board members Gregory Kazmierski and Jane Wiley present.

In total, the department received 2,033 comments via email and letter, including written and oral comments provided at the listening sessions. There were 157 oral comments alone taken at the five listening sessions.

The department staff read and tallied each of the comments received and synthesized them into usable data blocks for analysis. Many of the comments were directed at reducing hunting and trapping in specific state parks, and the department reviewed each of those circumstances and made appropriate adjustments to the implementation plan where warranted under Act 168.

Public Comments on Act 168- Hunting, Fishing and Trapping in State Parks.

Total number of comments received: 2,033

Identified as Individual: 1,244. Organization: 789

Municipalities represented: 278

Number of Petitions received: 18

Support: 84 or Oppose: 1,949 the department's draft plan.*

Support.

Supports hunting proposals: 32

Supports trapping proposals: 5

Supports both: 45

Opposed.

Opposed for safety impact: 1,750

Opposed for sensitive ecological impact: 377

Opposed to the legislation: 1,262

Proposed modifications:

Delay opening date: 244

Earlier closing date: 234

AM/PM closures: 38

Complete closure of park property: 887

Larger designated use buffer: 239

Close around trails: 404

Restrict rifle use: 112

Restrict trapping: 152

Number of individual park properties mentioned in comments: 40

Raw data of the tabulation of the public comments can be viewed at http://dnr.wi.gov/topic/parks/reports.html

^{*}Note: Those in support of the department proposal were those that clearly indicated their preference to open state parks to hunting and trapping. They may have offered suggested improvements in the plan. Those opposed clearly indicated a preference to keep state parks closed to hunting and trapping. They may have offered suggested improvements in the plan.

Appendix C: Comparison of Hunting in other State Park Systems

Many state park systems that allow hunting have identified areas on the park map where hunting is and is not permitted.

Hunting is typically not uniform within state park systems. If hunting is allowed, it varies by the park property (some perks open, some closed, some pertially open, some by permit only, etc.).

Typically, to find out what type of hunting is allowed in a park, visitors are encouraged to contact the individual park where they intend to hunt.

Extensive Public Hunting Allowed

Most parks are open to most hunting seasons

Limited Public Hunting Allowed

Hunting seasons limited, park spens open, time restrictions

Restricted Public Hunting Allowed

Very few properties open to hunting, few seasons, weapons restrictions, day and time restrictions

No Public Hunting Allowed

No hunting open to the public, all managed by professionals or park staff CR 1 park open for deer only

State	Type of Hunting	Times of Hunting	Example of Park				
Alabama Alaska	NONE Most to all hunting seasons. Discharge of firearms within 1/2 mile of any developed park facility is prohibited. Target shooting and firearms sighting is prohibited.	NONE Varies by Park and Seasons.	Chugach State Park allows hunling for black bear, bull moose; and by permit only: brow moose, Dall sheep and goat. Hunting is allowed for hare, grouse, ptarmigan, and water No hunting is allowed for squirrels, wolf, wolverine, coyote, and unclassified game. Toki Creek drainage (Arctic Valley Ski Area) is closed to all hunting.				
Arizona		Varies by Park and Seasons. Not all Parks are open to hunting. Designated areas for hunting in some parks.					
Arkansas	Conservation Area)	NONE, except one park (Hobbs State Park- Conservation Area)	One park open to most of the state's hunting seasons. See link to right for more into.				
California		NONE in state perks, however hunting permitted in some designated recreation areas	Aubum Recreation Area. Hunking allowed in specific locations, species, weepons and times, Hunting is only allowed September 1 to January 31 and spring harkey season for the species listed and only during the respective open season as established by the Fish and Game Commission. See link to right for more info.				
CONTACT	Seasons vary by park.	and season, Not all parks are open to hunting. (hunting not permitted with 100 yards of buildings and facilities)	Spinney Mountain State Park: Waterfowl opportunities exist for geese, malards, leaf, bufflehead, widgeons or gadwalls on the reservoir, Larger game hunters may find mule deer and the occasional pronghom entelope, Jackrabbits end coyotes are abundant for small game hunters. Open seasonelly, approximately April to November.				
Connecticut	Varies.	Varies by Park and Seasons. Not all parks are open to hunting.	Collis P. Huntington State Park, open to archery deer hunting only.				
Delaware	Various Seasons for Small Game, Waterfowl end Deer.	Varies by park. Not all parks are open to hunling.					
Florida	NONE	NONE	No Parks, but State Reserves offer special hunting seasons.				
Georgia	Deer quota hunts for management	Deer quota hunt varies by park, Not all parks open to hunting.					
Hawaii	Limited, Varies by Park.	Varies by Park and Season. Not all parks open to hunting.	Kahana State Park: Pig hunting in public hunting area on weekends and holidays. Napali Coast Park: Shore fishing and seasonal goat hunting only.				
Idaho	Limited. Varies by Park.	Varies by Park and Season. Not all parks open to

Appendix D: Wisconsin Conservation Congress Hunting/Trapping in State Parks Question from 2011

Question 52-53-Allow Trapping and Hunting on State Park Lands (# 540210): Wisconsin State Statute s. 29.089 does not allow any trapping or hunting on Wisconsin state park land, except for deer, elk, wild turkeys or small game in a state park or portion of a state park if the department has authorized by rule the hunting of that type of game in a state park or portion of a state park. This means that state park lands are closed to hunting unless specifically opened by an administrative rule. Once lands are designated as part of the state park system, there are no provisions to allow trapping of any kind and no opportunity for bear hunting. Currently Wisconsin operates 46 state parks totaling 84,000 acres (32 of the 46 parks are more than 600 acres in size). The DNR continues to purchase private land and put it into the state park system. In private ownership, many of these areas may have been open to hunting and trapping. Trapping techniques have changed in recent years and the use of dog-proof traps, cable restraints, and the late seasons that allow the trapping of some furbearers under the ice have made possible the opportunity for multiple land uses with minimal user conflicts. In addition, safe hunting techniques, education, and hunter awareness efforts have made hunting an extremely safe activity, even on lands that are simultaneously open to other uses and activities.

Park Name: STATE ICE AGE TRAIL AREAS (SIATA) and STATE NORTH COUNTRY TRAIL AREAS (SNCTA) -lands owned and managed by the Department of Natural Resources for the National Scenic Ice Age Trail and National Scenic North Country Trail.

Total Acreage of Property: 8,160

Estimated Acreage Open to Hunting and Trapping (Oct. 15-Thurs Before Memorial Day): 5,225

Estimated Acreage Closed to Hunting: 2,935

For public safety considerations, we request the NRB: - Prohibit hunting and trapping in WSP prior to Oct. 15 and after the Thursday prior to Memorial Day each year as noted on the map in gray. Prohibit hunting and trapping in areas beyond 100 yards of designated use areas shown on the map in gray.	No No	
DNR Designated Use Closure		
The Ice Age Trail and North Country Trail are national hiking trails which are a state park system designated use area.	Where it is developed and open, State Ice Age Trail Areas and State North Country Trail Areas will be closed for hunting and trapping within 100 yards on either side of the trail. Where the trail is not yet developed and open, hunting and trapping will be allowed on the full property unless otherwise restricted.	
Other Closure Considerations:		
Lands Open to Hunting and Trapping; Local Ordinance Prohibits Discharge of Firearms:	Local ordinances may apply within the boundaries of the properties, prohibiting actions such as the discharge of firearms. Please contact local officials for additional details.	
Department Does Not Own Hunting Rights for Property:	On several properties the department has easement rights for hiking, but has not purchased hunting rights. In these areas, hunting and trapping will be prohibited. The areas will be shown on a property map.
